Scenario B: few important features, least squares vs ridge (n = 100, σ = 0.5, 50 repetitions)
least squares (min-norm)
ridge, λ = 1
ridge, λ = 10
ridge, λ = 100
ridge, λ tuned by 5-fold CV
predict 0
noise floor
test error (median, band = IQR)
‖w‖ (median, band = IQR)
number of features d
number of features d
